This workshop includes an overview of business process charts, the basics of an effective business process chart and workshopping examples utilising Ascend 7's worksheet and chart template.

Intermediate Business Process Charting (2 hours)

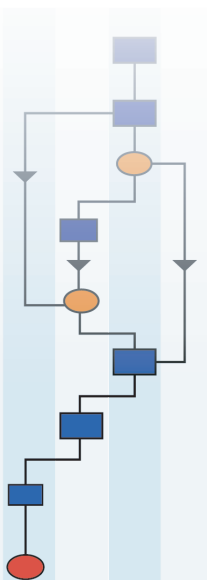

Helping you to understand more about Business Process Charts and sub-processes, and working with real world Business Process Charts.

Advanced Business Process Charting (2 hours)

A workshop that covers advanced techniques and how to solve common charting problems.

Who should attend?

- Managers
- Management representatives
- System implementers
- System coordinators
- Change managers
- Improvement teams

Facilitating Process Charting Sessions

Process charting may seem easy but it can be subtle and require experienced facilitators for best results. We can help you and your team map core business processes in a collaborative environment. For each process, we help you determine the scope, roles, actions, decision points, and inputs/ outputs.

Creating Business Process Charts in Visio

We also teach you techniques to convert the results of process charting sessions into process charts using Ascend 7's process charting software tool, A7CHART (Microsoft Visio-based).

Process Charting Experts

Ascend 7's highly skilled and experienced team includes project managers and business analysts holding significant process, systems and information management experience. We are experts in business process development and re-engineering, business process auditing, management systems, and online information systems.

Ascend 7 Also Offers

Ascend 7 also offers Business Management System implementation, maintenance, and configuration to achieve ISO or AS certification.
